Spring flowers around a windmill

Cowslips

Simon Bolton

Parrot Tulips

Sweet peas up

Tulips at dusk

Elephant Garlic

St John's School Lacey Green

New bulbs planted before Christmas

Sweet peas planted in November

Summer bulbs planted

Before

After

The Gardening Club at school had a productive time before Christmas - hence the lovely bulb display by the new music pavilion. Mr Newton the new head is very keen to encourage upkeep of outdoor areas, pots etc and keeps using images of the garden on the school website, the Friday News and even the Twitter feed! There was no club running in January until after Feb half term but we were in the throws of getting seeds on the go (peas, peppers, tomatoes and sweetcorn so far) when the lock down began. All are still coming on well and we hope to get them out whenever it's possible. Alison came to help plant sweet peas before Christmas and they are in great shape - also need to go out soon. You'll also see the transformation of the 'greenhouse' with polytunnel plastic - HUGE THANKS to Alison and Adam for their help - it'll be ideal for the next ten years or more. The wildlife garden has a plan of action (probably taking a couple of years to establish properly) and when we are able to get back to school we can update then.

Remember send in photos of your garden to horticultural.society@btconnect.com and also have a look at www.laceygreen.com/Sections/Hortsoc.php where some videos have also been uploaded.
