Bee on Delphiniums

Delphiniums & Escalonia

**Jane Elmidoro**

I raised my lupins from seed they are fantastic. The original plant was raised by seed when my granddaughter was a little girl so the plant is full of memories.

Crab Spider

Just to show we have crab spiders in every hue! This a white one on the white cosmos doing his dastardly deeds with the bees just as the yellow one was on the yellow peony. Obviously crab spiders are pretty busy this year.

Rose James Galway

A clematis (name I've forgotten!)

Rose Jude the obscure

Old fashioned sweet peas

Hosta

Sweet corn, peas and sweet peas

Artichokes

This rose been in my family for three generations. My grandfather grew it in his garden probably about 1930. When my parents moved into their house in the fifties he did a cutting for them and it grew vigorously on the front of the house round the bedroom window my sister and I shared. I used to try and make perfume from the petals and dry them because it has a wonderful perfume. Now I and my sisters have cuttings in our gardens! No idea what variety it is but it only flowers once a year.
